

# ORB

L'EPEE 1839 x MB&F

## Inspiration

A clean designed sphere, revealing an hour-striking mechanism; the first chiming function to be released within our creative art line.

The Orb is protected by 4 Elytra inspired from beetle insects, which can be opened not only to show the inside of the movement, but also to display this kinetic sculpture in multiple ways, like a polymorphic object.

  
*L'EPEE*  
1839

The chiming mechanism indicates the actual hour like a church clock

This function can be repeated on demand or turned off/on via a switch on the side of the clock,

## TIME-SETTING

4 elytra that can be opened up to allow multiple display options

- 2 barrels that are wound separately:
- for the timekeeping mechanism
  - for the chiming mechanism

When closed: 4 tiny magnets keep the shape of a perfect sphere

**POLYMORPHIC CLOCK WITH MULTIPLE DISPLAY OPTIONS**
