With the introduction of the *Mechanical Watch Box*, L'Epée 1839 enchants discerning watch enthusiasts. This masterpiece of mechanics elevates your precious wristwatch to a transparent stage that not only showcases your watch, but also highlights the excellence of [L'Epée 1839's](#) engineering. The Watch Box becomes an emotional bridge between the wearer and the watch by showcasing the unique mechanical character of timepieces. Because a watch is much more than a tool – it is an expression of personality, style and individuality.

Design meets functionality

With a simple push of a button, the Watch Box comes to life: an elegant lifting system opens the box and simultaneously lifts the watch into a presentable position. When closing, the nifty mechanism is automatically reset and prepared for the next presentation.

As with all L'Epée 1839 creations, every component of this watch box has been developed and manufactured entirely in-house. This independence not only allows for the highest quality, but also uninterrupted functionality without the need for manual lifts.

A transparent work of art

The case of the Watch Box is made of crystal-clear acrylic glass, which reveals the filigree gears and levers. Inspired by the complexity of high-quality mechanical watches, the box reflects the precision and aesthetics of watchmaking. The interplay of polished, sandblasted and satin-finished surfaces reinforces the luxurious character and makes the Watch Box a work of art in its own right.
