

TIME FLIES

BY L'EPEE 1839 x L'ECAL

Inspiration

Time Flies is an 8-day clock in the form of a stylized 1930s plane, offering just enough structure to provide form, and just enough empty space to inspire our imaginations.

Hours and minutes are displayed on large diameter stainless steel disks with black PVD coating on a circular-brushed satin finish and stamped numerals. A quick glance is enough to read the time thanks to the excellent legibility of its display, but the spectacular, skeletonized movement is worthy of deeper contemplation. The movement, built specifically for this Time Flies, allows the escapement, which regulates precision, to be displayed in the cockpit. Accuracy is in the pilot's seat!

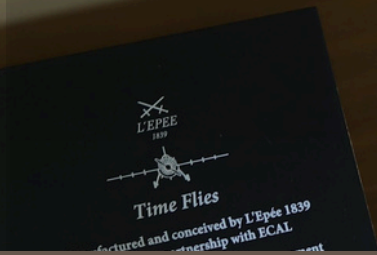

Playful Interaction:
Time Flies' propeller
can spin manually

SET THE TIME

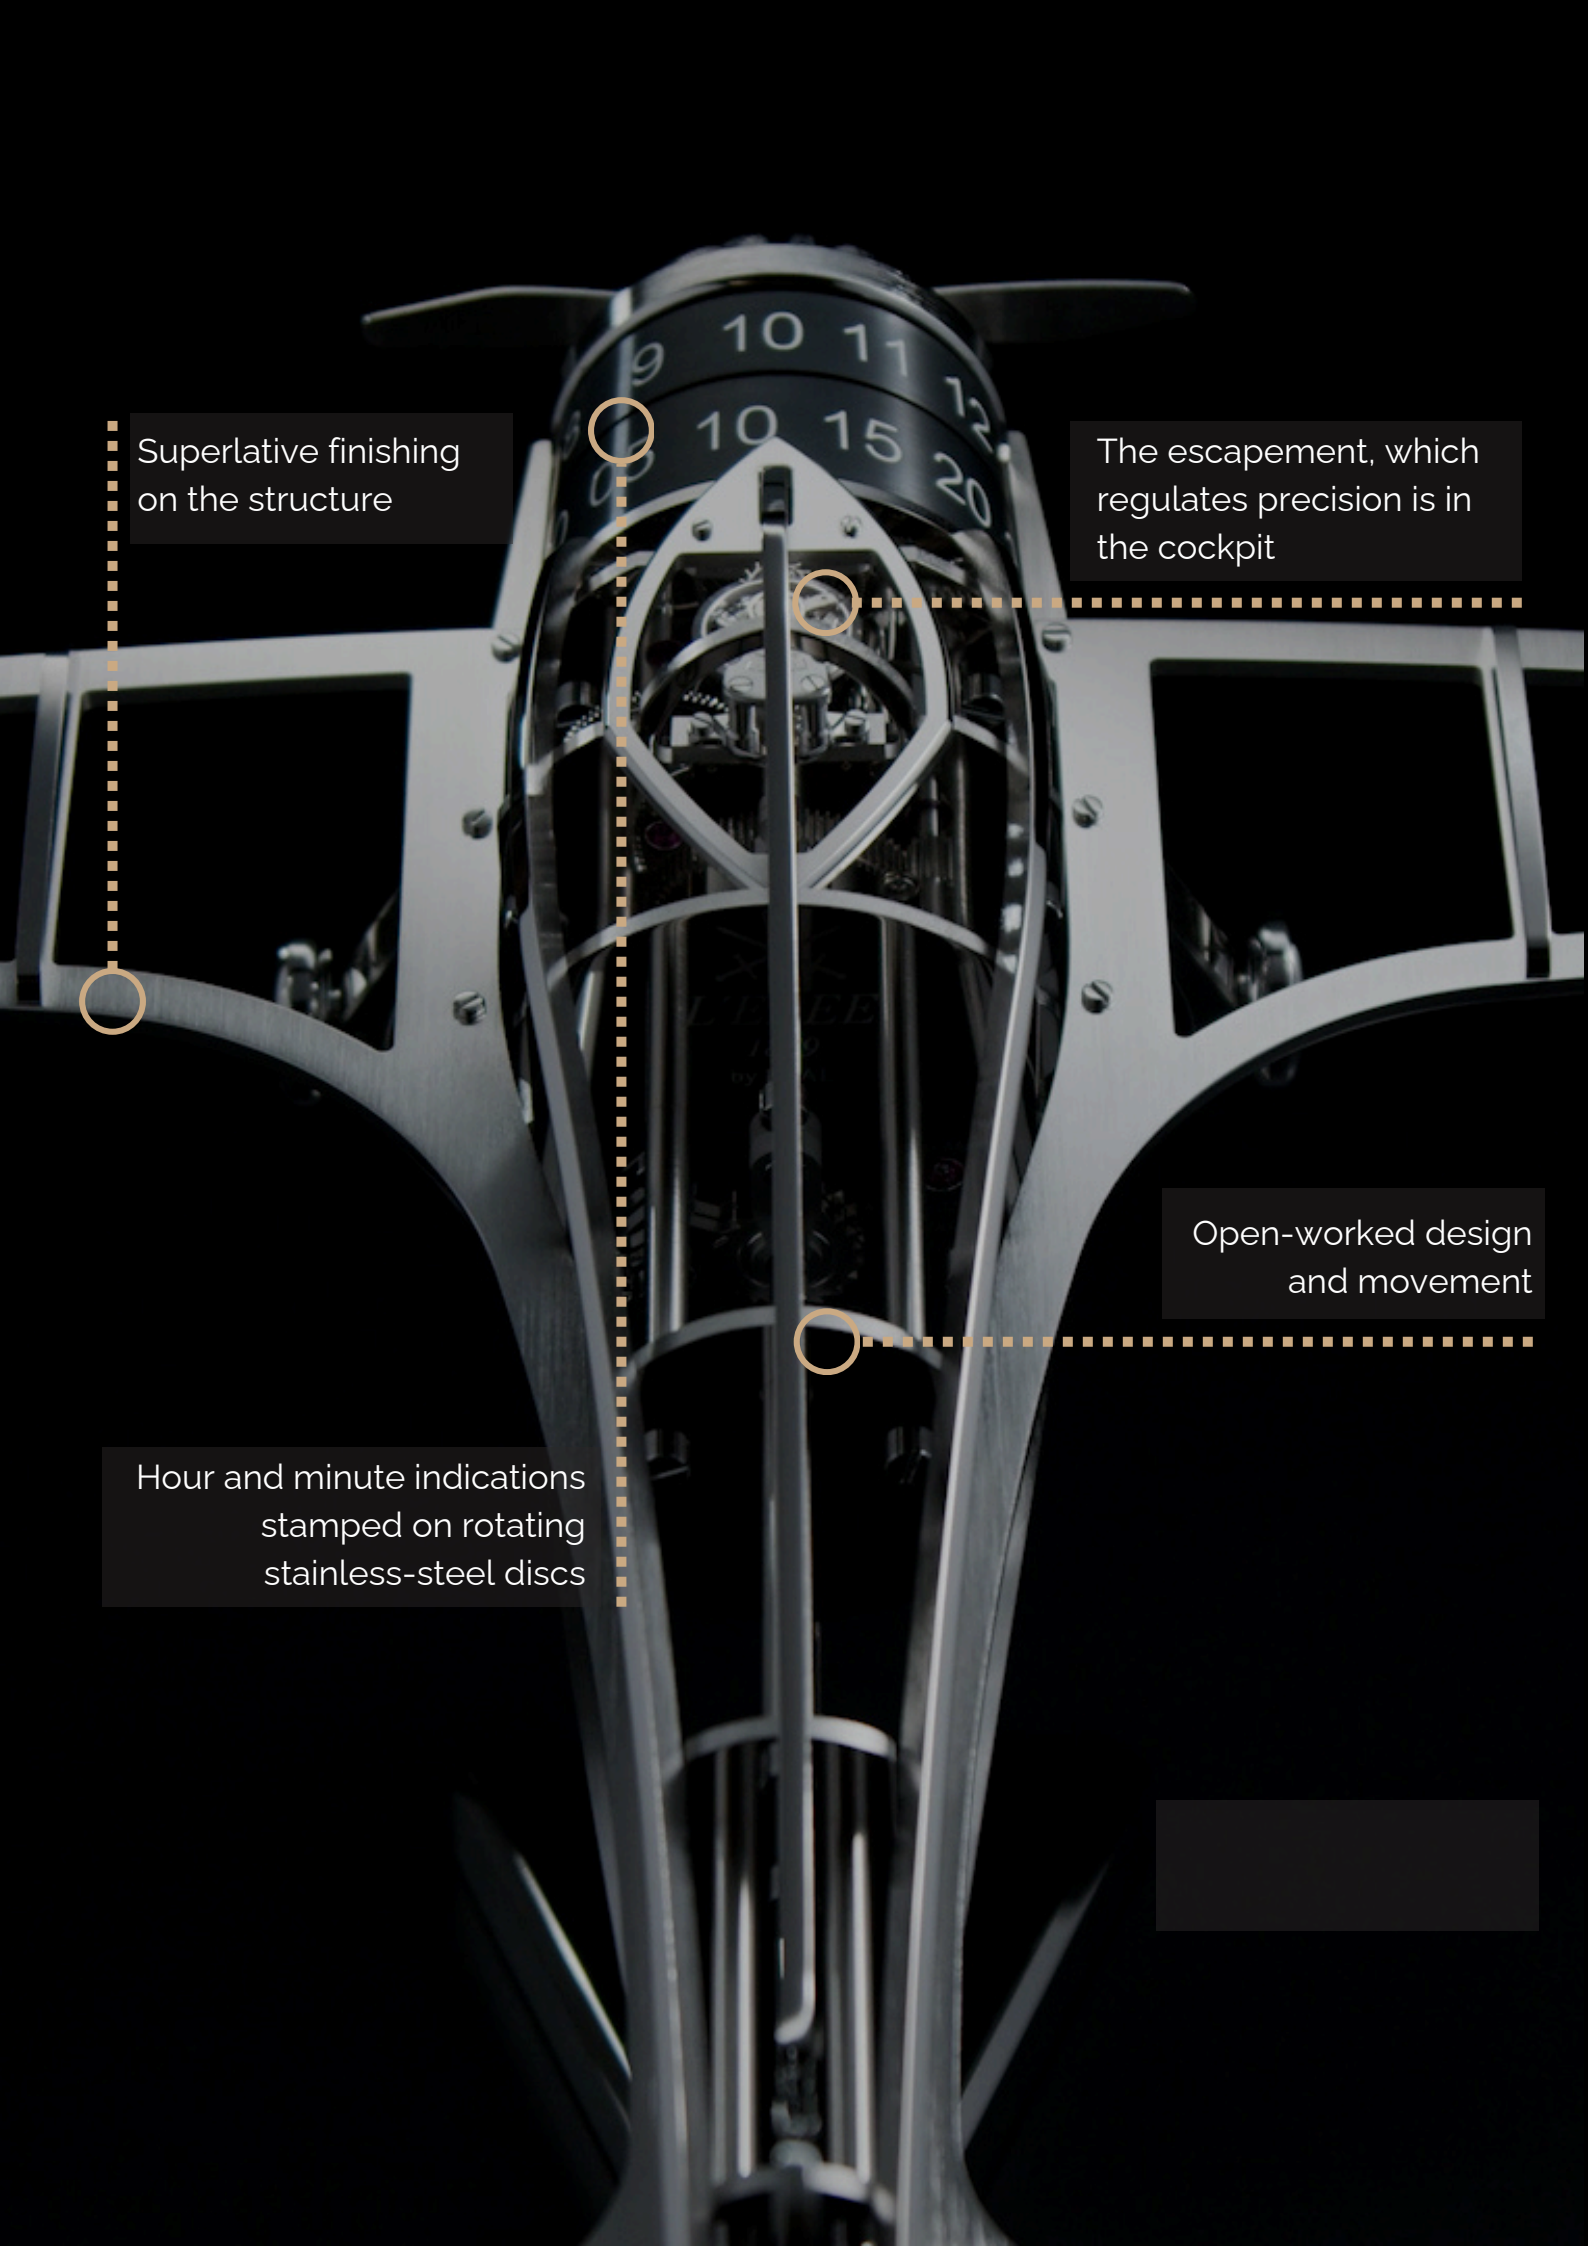

WIND THE MOVEMENT

Manual winding and time
setting by rotation of a large
crown representing the
engine radiator

Different display
options; on a mounting
stand or without
or hanging on the wall
with a special kit

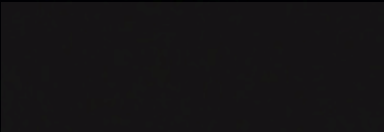

Superlative finishing
on the structure

The escapement, which
regulates precision is in
the cockpit

Open-worked design
and movement

Hour and minute indications
stamped on rotating
stainless-steel discs
